Señor Roberto Francisco Pablo

AI Engineer & Full Stack Developer

Baguio City, Philippines · robertopablo13.rp@gmail.com
Portfolio: francisco-pablo-portfolio.vercel.app · LinkedIn: linkedin.com/in/señor-roberto-francisco-pablo-b748581ba

SUMMARY

AI Engineer and full-stack developer who designs and builds AI-powered systems, LLM-based agents, automation workflows and scalable backend applications. Turns AI concepts into reliable, production-ready features across Python, TypeScript, Node.js and Next.js. Experienced in integrating LLMs into real-world workflows, designing backend architectures and building automation pipelines. Interested in AI agents, workflow automation and SaaS platforms.

SKILLS

- **AI and agents:** LLM integration, AI agents, LangChain, LangGraph, workflow orchestration, n8n
- **Backend and APIs:** Python, FastAPI, Node.js, Supabase, API integrations
- **Frontend and full-stack:** TypeScript, Next.js
- **Tools:** Docker

EXPERIENCE

AI Engineer, ShiftCare (New South Wales, Australia, remote) · May 2026 to present

- Build full-stack AI agents, covering the LLM agent logic, backend services and the application layer around them.

AI Engineer, Stealth-Mode Startup (company undisclosed at the employer's request) · January 2026 to May 2026

- Worked as an AI Engineer on an early-stage, confidential product.

AI Engineer, THEOSYM (California, United States, remote) · November 2024 to January 2026

- Developed AI-powered full-stack applications and backend systems with LLM integrations and workflow automation.
- Built and deployed AI-driven applications, backend APIs and LLM-based solutions for production use.

EDUCATION

BS Information Technology, Major in Network and Security · University of the Cordilleras · January 2022 to April 2026
